

COVID Info

The system accepts, stores and facilitates users to filter data regarding COVID, helping users quick retrieval of desired information.

The system will allow users to:

1. Insert Data
 - Users can enter case details through two mediums: manual and file I/O.
2. Display Information
 - Users are allowed to see information with different parameters such as country, date, and other required information.
3. Display Symptoms and Content
 - Symptoms are displayed to help the user understand and learn symptoms.
 - Shows how to protect yourself.

Concepts Utilized

- FileIO
- Process Management
- Threading
